

South Caucasus Pipeline Expansion in Georgia

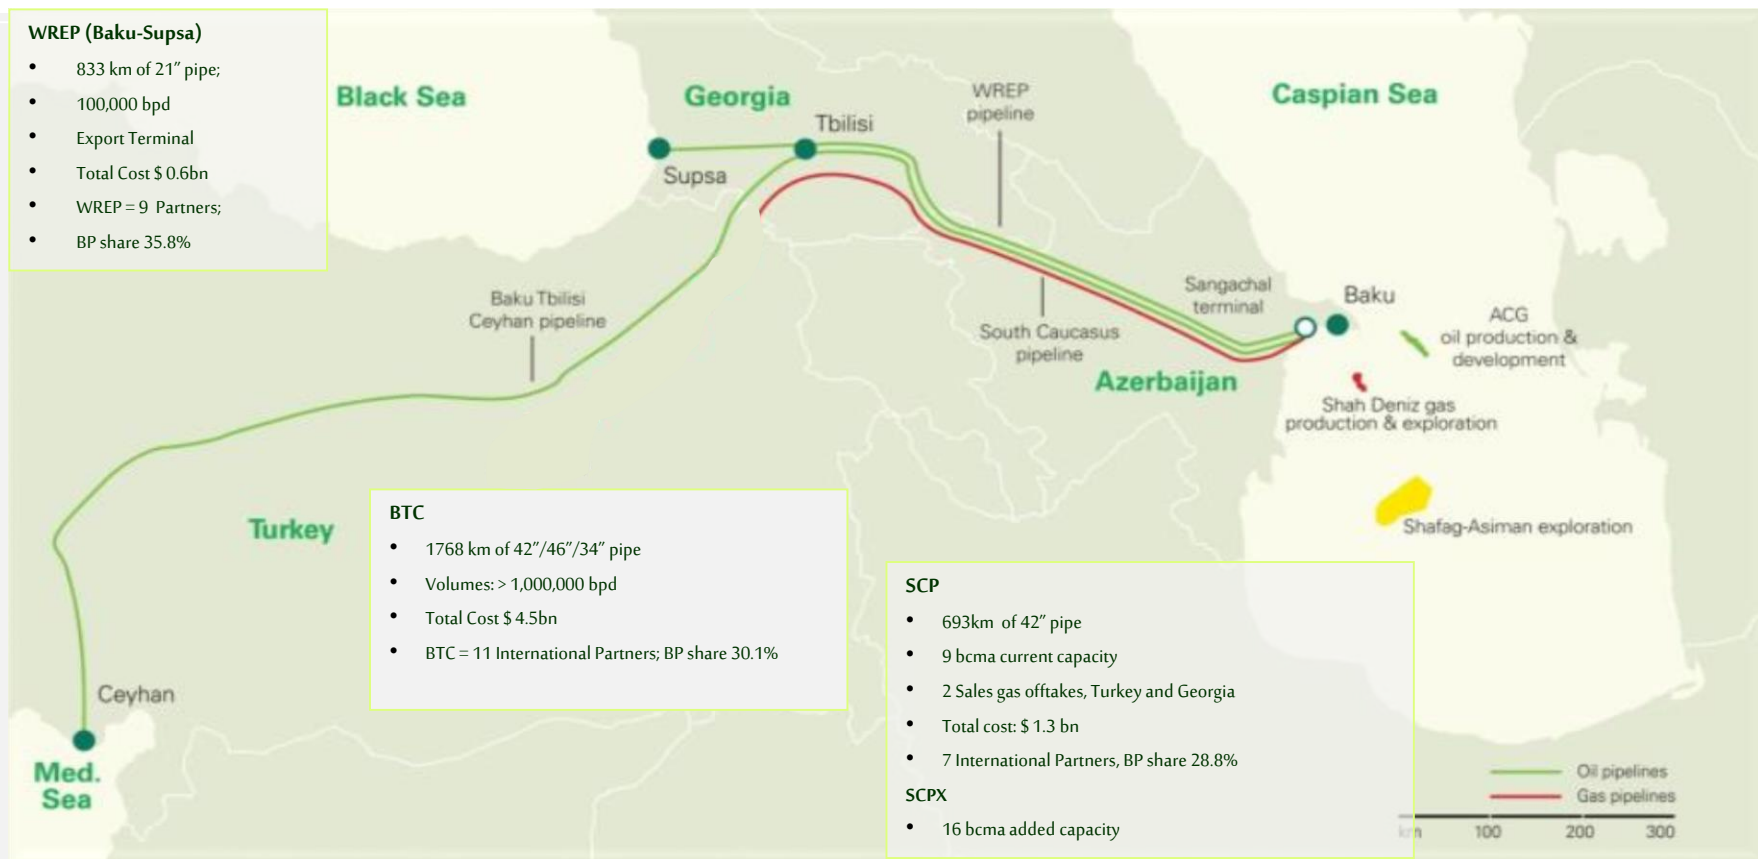

Chris Schlueter, December 2016

Major BP offshore operations in the Caspian

- Over the past 22 years since 1994 together with our partners we have established a unique track record of major project delivery in the Caspian
- Offshore operations involves 9 platforms: Azeri-Chirag-Gunashli and Shah Deniz Stage 1; Under Development = Shah Deniz Stage 2

Safe and Reliable Operations in Georgia

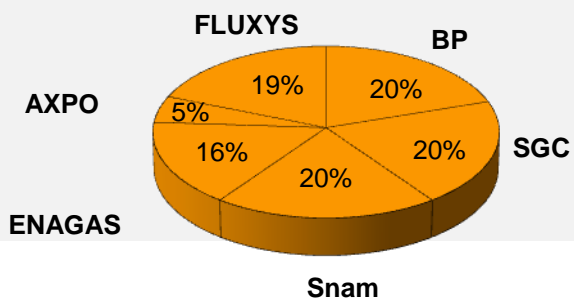

- 2016 marks BP's 20 years in Georgia
- Transporting ~1% of world oil and gas
- 3 billion USD invested in operational and development projects

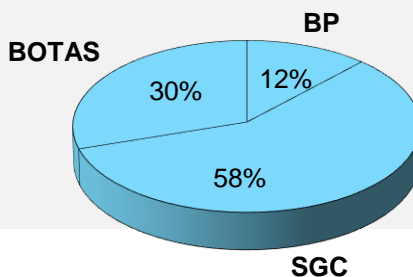

The Southern Corridor

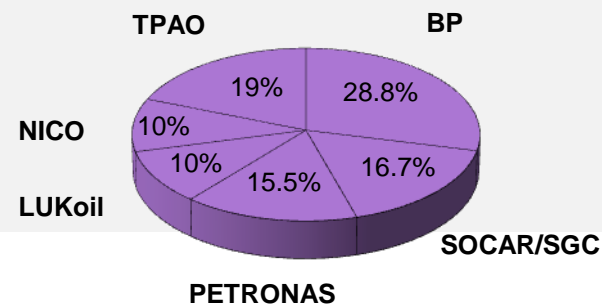

Trans-Adriatic Pipeline (TAP)

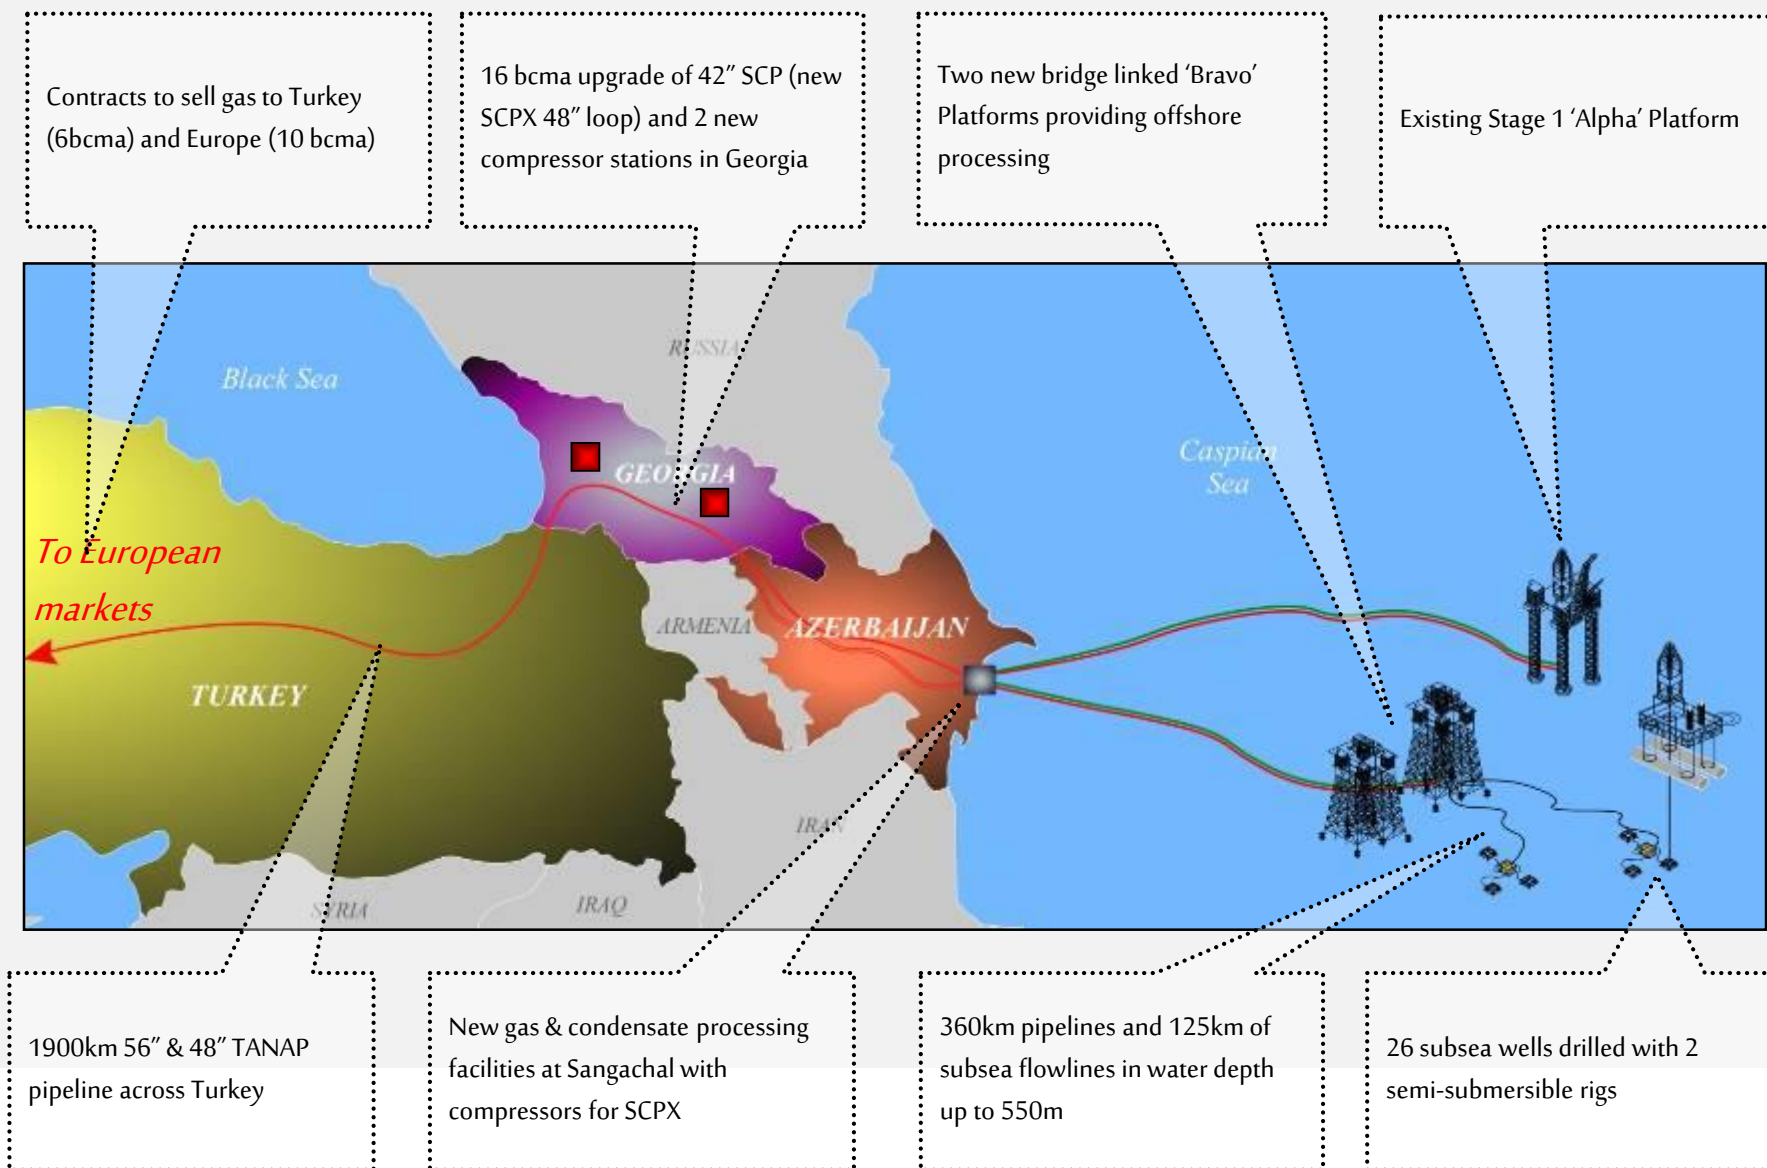

Trans-Anatolian Pipeline (TANAP)

Shah Deniz 2 and SCP Expansion (SCPX)

Shah Deniz 2 Program

South Caucasus Pipeline Expansion – GEORGIA PARTICULARS

- **Georgia current total demand for gas ~ 2.5bcma**

- 0.7bcma supplied from SCP; 1.5 from SOCAR; remainder from Russia (~10%)
- SCPX will enable up to an additional 0.8bcma gas

SCPX update (Georgia)

Compressor Station Georgia 2 in Tsalka

Pipeline TANAP intersection

- SCPX construction remains on-track to start up in 2018 as scheduled.
- Compressor station construction is on-track. Compressor Station #1 is near the Georgia-Azerbaijan border at Gardbani and Compressor Station 2 is in the mountains near Tsalka.
- New 48-inch diameter SCPX pipeline is being installed from the Azerbaijan border 66 km in to Georgia.
- Near the Turkish border, a pressure reduction and metering station and TANAP connection are under construction.
- Modifications to Georgia gas offtake are designed and will be installed in 2017.

THANK YOU !
